Told He Would Be Well Paid.

There was no mention of a special fee, Mr. Breen says, but he was told that he would be amply compensated for his services in winning over Mr. Heintz, Mr. Breen was at this time Mr. Heintz, Mr. Breen was at this time Mr. Heintz, adviser. He did not, he says, appear openly in the arguments which were made before the Commissioner by the advocates of the trolley system. He kept in the background and used his powers of persuasion to such good advantage that although Mr. Heintz was for a long time obdurate, and "in spite of the fact that among the protesting property-owners were his own relations and friends, including the John Eichler Brewing Company and the William Ebling Brewing Company, Mr. Breen succeeded in changing his views, and about the first day of October, 1891, his consent was given to the Company."

About this time the "Huckleberry

About this time the "Huckleberry bill" was introduced in the Legislature and its provisions, Mr. Breen is forced to admit, proyoked a storm of opposi-tion. When the bill reached a hearing in the Sanate, a resolution was passed pro-viding that the Mayor, Comptroller and the Commissioners of the Twenty-third and Twenty-fourth Wards be asked to express their individual opinions of the

measure in writing.

Mr. Breen has his little joke just here when he says, parenthetically, that Mr. Heints's well known opposition to the trolley was relied upon to defeat the bill. Breen, however, in the interests of the Company, drew up a statement avoring the passage of the bill, and 'finally succeeded in persuading Mr. Heints to sign it."

Opposition Silenced.

This statement coming from the Com-nissioner completely silenced the oppo-ition and secured the passage of the neasure, "which has been so fruitful of measure, which has been so related was an marked that his services were continued, and, as set forth in the bill of particulars, he plunged into the fight particulars, he plunged into the fight part of September, will, it is said, he of tranchises by the Town Board of West heaster to the "Huckleberry" people.

five traction companies were, after hard fight, granted by the Westchester wn Board by a vote of 4 to 2.

Then Mr. Breen goes on to tell how he conducted the long struggle, in which he brought into play both his legal attainments and the wonderful persuasive powers granted him by a kind Providence. Under an old charter granted to the Harlem Bridge, Morrisania and Fordham Railroad Company in 1861, Mr. Breen decided that the Union Company, its successor, had a right to lay tracks. Tracks were laid, and then followed arrests, prosecutions before a Justice of the Feace and motions to punish town officials for consempt of Court in order. the Peace and motions to punish town offidals for concempt of Cour. in order, s

Appeals, demurrers, motions and a whole string of legal pro-ceedings followed, but before the ques-tions were finally argued in General Term (note here the delightful facility with which Mr. Breen disposes of it) "the matters in controversy were set-tled, and to-day the Union Railway Company runs its cars into the village of Westchester over the very roads where its tracks were torn up" by an enraged populace.

The manner in which the "matters in The manner in which the "matters in controversy" were so quietly adjusted will, it is said, be brought out by Mr. Breen's testimony before Referee Sewell Under the subdivision relating to the services rendered in the case of W. 1500 against the Union Hailway Company, Mr. Breen tells how he again brought into play his remarkable ability to make people do what they don't want to.

He "Persuaded" Everybody Mr. Watson got an injunction restraining the Huckleberry Company from laying tracks on the Westchester Turnpike and the West Farms road. It looked like a long and complicated fight, but one day, Mr. Breen says, in an interview with a representative of the Watson estate, he "convinced him that the estate would be largely benefited by the proposed railroad," and, of course, the matter was settled then and there.

Shortly afterwards, by consent of Watson's representative, the injunction was dissolved.

Mr. Breen earned some more of his \$135,000 fee when he gave his services in the contest for franchises before the Board of Trustees of Williamsbridge.

According to his statement, in August.

the contest for franchises before the Board of Trustees of Williamsbridge.
According to his statement, in August, 182, the Union Railway people notified Mr. Breen that the traction companies which had given them so much trouble had applied for franchises over certain streets in that section, and he was requested to take a run up there and adjust things.

On looking over the ground Mr. Breen found that the traction companies had played sharp on him and had put in their application for a franchise, which would give them an entry into the city by way of the bridge over the Bronx River at Williamsbridge. This would give the opposition control of the connecting link between New York City and Westchester Village, South Mount Vernon and the city of Mount Vernon. Mr. Breen saw that this would never do and decided to argue the point.

"It is true." he says in his bill of particulars, "that the Union Company was not, so to speak, properly before the Board, in that it had not yet made a formal application, while the traction companies had, and were regular in all respects, and insisted on their right to the franchise, as the public notice required by law had been duly published and all the provisions of the statutes complied with.

"Plaintiffs on behalf of the Union Company, pleaded and argued at length with the Board of Trustees to defer action until their Company should make a regular application."

This was at a meeting of the Town and removes a doerd, which had been called to con-disfigurations. It also ider the traction companies' applica-gives strength, creates tion.
The struggle, according to Mr. Breen, issted from S P. M. until near midnight, but "by the skilful management of the plaintiffs the matter was adcurred, thus giving the Union Com-

"While Morris was in control of the Town Board," says the bill of particulars, "it was impossible to secure these advantages," meaning the franchises. It was determined to curb the "Morris influence," so as "to charge the complexion of the Town Board at the next election." "When the Fall election approached Mr. Morris was announced as a candidate for the nomination for Member of Assembly. Plaintiffs explained to the Union Railway Company that Morris's election would not only secure his power in the Town Board, but would enable him to still further embarrass the Company in other directions.

"The Company therefore determined to defeat Morrie's nomination, and if nominated to defeat him at the polls if possible."

Then Mr. Breen got out his pen and began to write for the local press. Many and long were the articles printed, with a view of defeating Mr. Morris's nomination.

remember that the franchises were taken from under the very noses of the people who had to all intents and pur poses a prior right to the privileges.

Thinks His Services Cheap. "Here is a franchise worth over \$2,000,000 placed right in their laps for practically nothing—outside of my fee—and what is \$135,000 as compared with the value of what they have got."

Mr. Breen to-day would not admit that he had spent a dollar in influencing the actions of those who had the power to grant the "Huckleberry" franchises. It was all due to his argumentative power, he declared.

It is not admitted by Senator Hill's friends that he is weak because he yielded. They say he withdrew his opposition in the interest of party unity. But a glance several years back shows to the Anti-Snappers that there was a lime when the machine did not want harmony if it required the conciliation of the division of offices with the Anti-Snappers.

When Senator Hill left the Governor's chair there was not a Republican of any importance left in office. Every office was filled by a Democrat, 19 per cent, of whom were of the machine stripe.

The Anti-Snappers were regularly reduced Hurley's property. Some years ago John Kerwin, a merchant, sought to purchase from William Miles a piece of property fronting on the river in Williamsburg. He found, however, that the tenants had not been paying rent for a long time, and on asking Miles about it, was told that the property really belonged to a poor relative called Hurley, and that, therefore, Miles would only have power to lease and not set if the Governor's chair there was not a Republican of any importance left in office. The seventh, eighth and ninth subditions of the bill of particulars are devoted to the methods followed in obtaining the franchise from the Board of Trustees of South Mount Vernon, the part played by Mr. Breen for the "Huckleberry" road in the case of one Crawford, who consented to be the catspaw of the franchise-grabbing corporation against the oBard of Trustees, and the manner in which the influence of Mayor Brush, of Mount Vernon, was enlisted to help the "Huckleberry" people to get what they wanted from that city.

About thirty of the typewritten pages of Mr. Breen's statement are devoted to a minute and detailed account of his movements while employed in persuading opponents of the Union Rallway to come over to his side of thinking.

It is probable that when the reference is continued, next month, an effort will be made to keep the testimony from the public, as has been done up to this time.
